

WORK EXPERIENCE

Financial Analyst – Seton Healthcare (2018 –2019)

- Served as the lead analyst in developing complex compensation models for Seton’s most valued physicians.
- Created trackers to ensure provider earnings fall within fair market value thresholds. Customized models to meet contract specifications agreed between legal and individual providers.
- Structured data to forecast monthly accrual expenses for several departments. Aligned financial KPIs with the setting of fiscal year budgets.

Senior Business Planning Analyst – Seagate Tech (2017 - 2018)

- Oversaw sales planning and demand forecasting for Seagate’s highest revenue OEM accounts.
- Led the weekly cadence between management and sales, establishing current supply constraints and market risk.
- Effectively allocated regional supply inventory and lowered aging hub inventory below the targeted 90-day standards.
- Restructured regional sales objectives to align with goals set by executive management.

Market Risk Control Analyst – Sequent Energy Inc (2014 –2017)

- Proven success as the primary point of contact and publisher of Seton’s official daily financial performance report.
- Performed daily energy market risk analysis. Provided sound financial revenue reporting to senior management.
- Collaborated with accounting to publish cumulative month end, quarterly, and year-end P&L values. Accurately reported \$130 million in company record 2016 earnings.
- Automated daily reporting tasks by testing and implementing Excel macro enhancements.

Middle Office Intermediate Analyst – Citigroup (2010 –2014)

- Reconciled and supported front office transactions through all lifecycle events. Experienced in exchange cleared and OTC derivatives across all energy markets.
- Successfully implemented an audit process to support the expansion of the Investor Products group. Calculated daily risk exposure held by the North American Investor Products team.
- Actively collaborated with platform developers in testing enhancements to Openlink. Played a primary role in automating trade-booking capacity for unconventional crude products.

PROFILE

Currently enrolled in a 10-month immersive full stack software engineering program. I have effectively designed, developed, and maintained projects written in Javascript, Node.js, Express.js, SQL, CSS, & HTML. I also successfully created and setup remote API’s to interact with personal databases. In addition, I am gaining the knowledge to effectively build mobile applications with React & React Native

SKILLS

Javascript	=====
Node.js	=====
MySQL	=====
CSS	=====
HTML	=====
Microsoft Excel	=====

EDUCATION

Texas A&M University –
College Station
Bachelor of Science in
Economics
Minor of Business
Administration

Austin Coding Academy
Full Stack Web Development
Graduation – April 2020
